What is Takaful?

Takaful is an age-old Islamic concept of mutual help and support blended with modern concepts of actuarial science, underwriting and investment under the supervision of Shariah advisor. It is a Shariah compliant way of supporting each other in case of death or disability.

How does it work?

Unique Benefits of Uroos Marriage Plan

1. Death benefit is the sum covered plus Participant Investment Account (PIA) value.

2. In case of accidental death ADB sum covered shall also be paid.
3. In case of accidental death in Saudi Arabia while performing Hajj or Umrah, ADB sum covered shall be doubled.
4. Continuous growth: At the end of each year the surplus (if any) in PTF is distributed among eligible participants and in case of deficit, same is financed by Window Takaful Operator as Qarz-e-Hasana.
5. Investment made only in Shariah compliant funds (Sukook etc.) as approved by Shariah advisor.
6. Allocation of contribution increases above 100% from 6th year onwards.
7. At the maturity payout option in form of lump sum payment.
8. Cash withdrawal option from PIA is available from 1st year provided minimum amount of withdrawal is as per company's terms and conditions.
9. Tax benefit on amount of contribution payments as per FBR Rules.

Bank Alfalah in partnership with IGI Life–Window Takaful Operations, presents Uroos Marriage Plan, a Takaful Marriage Plan, which is uniquely designed for Bank Alfalah customers. The plan is designed to offer Takaful benefit along with growth of funds to meet your children's marriage expenses.

It is a Shariah compliant plan by IGI Life–Window Takaful operations that safeguards you and your family while providing growth of funds to meet the children's marriage expenses. The plan assists participants to share their risk on the basis of cooperation, brotherhood, mutuality and solidarity for a common good. There is flexibility of customising the solution through additional protection benefits as well as by selecting the level of takaful cover as per need.

How does the Takaful membership operate?

IGI Life's Takaful model is based on the Wakalah-Waqf principal. Individuals in the community come together for a common purpose and contribute into a Waqf Fund operated by a Window Takaful Operator to protect themselves against future financial losses.

What is surplus sharing?

Participants of the takaful fund as per the terms and conditions of the Waqf, may be entitled to a share of possible surplus funds. Takaful offers a unique feature of Surplus Sharing to the Participants in addition to risk mitigation benefits. As approved by the Shari'ah Advisor and Appointed Actuary at the end of each year, IGI Life - Window Takaful Operations will determine the surplus (if any) available in the PTF for distribution.

What are the benefits of surplus sharing?

Part of the surplus (if any) in PTF is distributed amongst eligible participants in the form of bonus units through additional unit allocation in the Participant's Investment Account (PIA). The allocation of these bonus units will enhance the cash value of your Takaful Plan.

Takaful Benefits

Death Benefit

Takaful benefit payable in case of the unfortunate event of death during the membership term will be as follows:

Sum covered plus Participant's Investment Account (PIA) value plus the accumulated account value of top-up account plus surplus (if any) as per PTF policies of WTO.

This is the minimum amount payable on the death of the participant. The basic sum covered will be a multiple of basic contribution. The following two multiples will be offered to the participant: 5 or 10.

Built-in Additional Benefits

- Waiver of Contribution–Disability: WOC waives the future contributions in case of permanent total disability of the covered person up to the end of term

The contribution for the above benefits will be paid by the participant.

Maturity Benefit

On completion of the membership term, the available Participant's Investment Account (PIA) value along with the account value of top-up account (if any) will be payable to the participant. The accumulated value in PIA will be payable in a lump sum.

Contribution Indexation

Indexation is an optional feature offered in this plan. Under this feature your contributions and sum covered will increase by a fixed amount every year leading to a better cash value accumulation and consequently a higher maturity benefit. Even once opted, you still have a right to decline the option and continue paying level contribution subject to certain terms and conditions.

Optional Benefits

There are various additional benefits which may be attached to enhance the Takaful coverage, these are as follows:

- Income Benefit-Death: A monthly income benefit will be provided following the death of the participant up to the end of the elected term of this supplementary benefit. This benefit shall be payable from Individual PTF
- Income Benefit-Disability: A monthly income benefit will be provided following the permanent total disability of the participant up to the end of the elected term of this supplementary benefit. This benefit shall be payable from Individual PTF
- Accidental Death Benefit: ADB pays a lump sum amount in case of accidental death of the participant

In which funds will my contributions be invested to build up the PIA for my future needs?

Your contributions will be invested in Shariah compliant investments to build the PIA.

You will be offered 3 different Shariah compliant investment strategies: Conservative, Balanced and Aggressive as described below:

Takaful Conservative Strategy: The strategy would be the most appropriate for those participants, who wish to invest more cautiously. Accordingly, the investments are placed in short-term fixed income Shariah compliant instruments with little exposure to equities.

Takaful Balanced Strategy: This strategy seeks steady growth in capital through investments in combination of Shariah compliant fixed income and equity investments. It has moderate risk.

Takaful Aggressive Strategy: This strategy seeks to provide you with long term capital growth through mutual funds that invest mainly in equities. It has higher risk.

Under each strategy you have an investment account as listed in the application. The percentage of contribution you wish to allocate to buy units in an investment account should be indicated in the application. The sum of these percentages must be 100%.

You can manage your investments by creating your own investment strategy portfolio from a range of options to suit your needs and preferences. You will have the option to transfer between investment accounts subject to certain conditions.
